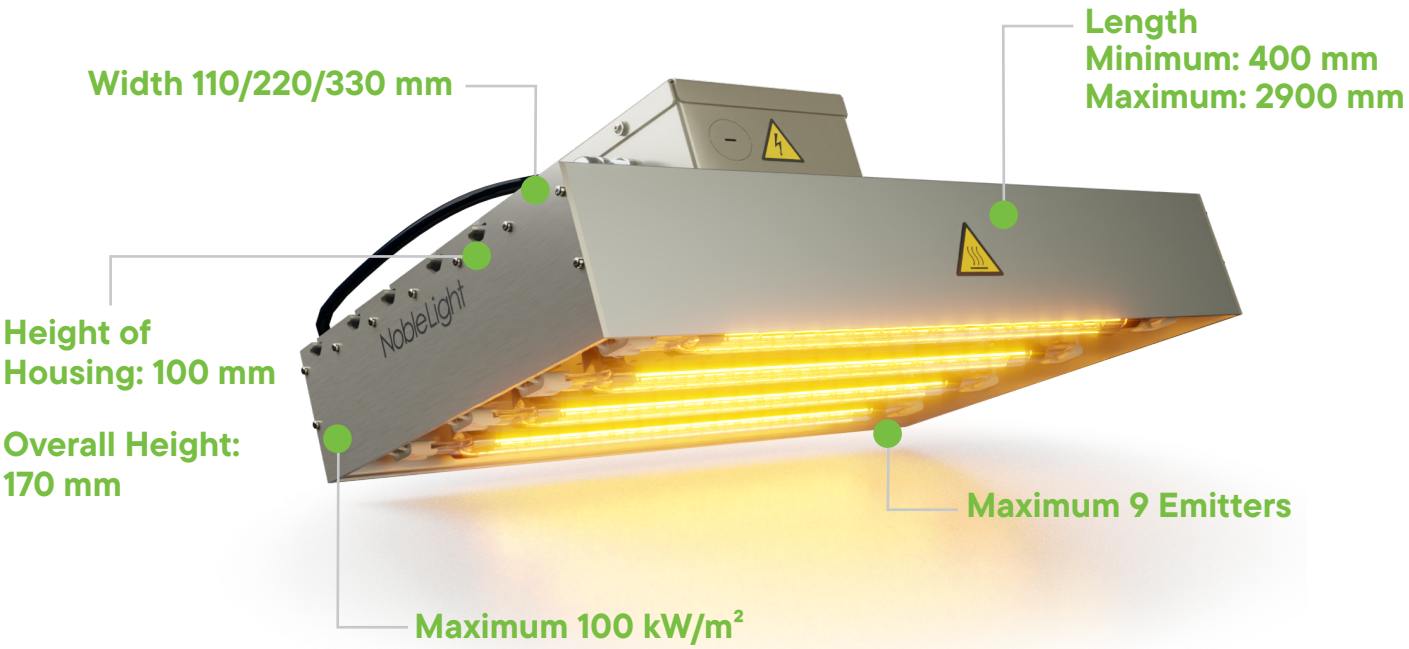
NobleLight®

M Series Infrared Modules

Ready to use: Industrial Heating Components



Raw Material: Housing-Aluminum profile
Working Condition: Normal atmosphere (maximum 104 °F/ 40 °C, erection position up to 1000 meters above sea level, no condensation)

For Composite, Coating, Adhesive, and Elastomers

The M Series infrared modules are available in three standard sizes (110/220/330 mm) and ship within just a few weeks, making them an ideal choice for fast project implementation. Each aluminum module accommodates up to nine emitters, depending on the housing configuration. Modules can be combined to create larger heating arrays, providing a flexible, cost-effective solution for both new installations and retrofits. Contact us!
